At 7F #710, Nishi-Waseda Bld., Waseda University

Economics Seminar

Interaction between Trade, Conflict and Cooperation: the case of Japan and China

Shiro Armstrong

Crawford School of Economics and Government,
Australian National University

The focus of the study is on the Japan-China relationship where trade is growing quickly despite long standing political distance between the two countries. The complex interaction between trade and politics is analysed using Granger causality tests. The purpose is to determine the presence and direction of causation between trade and political events, both positive and negative, and to gauge an idea of the lag length of causality.

The Presenter:

Shiro Armstrong: PhD student, Crawford School of Economics and Government, National University

Admission: Free / No pre-registration / Language: English
